

The vision of the Erwin Hymer Group is to enable people worldwide to enjoy unique leisure and mobility experiences. As an international group of companies, we unite numerous caravan and motorhome manufacturers, accessory specialists, and rental and financing services under one roof. With passion and know-how, around 7,350 employees at our sites in Germany, France, Italy, the UK and China are constantly producing groundbreaking innovations. Together with our parent company Thor Industries, we form the world's leading manufacturer of recreational vehicles with over 25,000 employees and offer exciting career prospects.

As System Engineer E/E (m/f/d) you will play a central role introduction new technologies and contribute to the digitalization strategy of the ERWIN HYMER GROUP. In our Technology Team you will develop smart wiring system structures that control all motorhome brands within the Group and create unique leisure and mobility experiences for our customers.

## System Engineer Electrics & Electronics (m/f/d)

### KEY RESPONSIBILITIES

- Development of concepts for wiring system structures (12V and 230V) in connection with the requirements of the caravanning body in the context of agile projects
- Preparation of specifications and requirements in coordination with the brands of the ERWIN HYMER GROUP and our international supplier networks
- Integration and testing of components in the wiring system of the caravanning chassis and superstructure
- Partner of all development departments of the ERWIN HYMER GROUP, the central purchasing department, and the quality assurance department
- Further development and standardization of design guidelines

### QUALIFICATIONS

- Completed studies in electrical engineering, mechatronics, or comparable qualification with a focus on automotive engineering
- Several years of professional experience in the development, specification and testing of electric vehicle components
- Practical knowledge of digital automotive wiring systems
- Experience in managing (agile) projects, ideally project management qualification
- Knowledge of E-CAD applications is an advantage
- Advanced English and German language skills
- Entrepreneurial mindset with a high result rate
- Commitment, team spirit as well as strong communication skills

### OUR OFFER

- Exciting and varied tasks with a lot of creative freedom in an international group of companies
- A motivated team, trusting cooperation, flat hierarchies and fast decision-making processes
- A wide range of individual training and development opportunities at our internal EHG Academy
- Trust-based working hours with home office options, childcare, vehicle rental at employee conditions, participation in the job bike and other offers
- Performance-related remuneration and employer allowances for social benefits
