

To enable unique leisure and mobility experiences for people all over the world – that's the vision of the Erwin Hymer Group. As an international group of companies, we unite numerous caravan and motor home manufacturers, accessories specialists as well as rental and financing services under one roof. More than 8.900 employees in Germany, France, Italy, the United Kingdom and China bring about trail-blazing innovations with passion and know-how. The Erwin Hymer Group is a subsidiary of THOR Industries. Together we form the world's leading manufacturer of recreational vehicles with over 31.000 employees.

As Lead Engineer Electromobility (m/f/d) you will play a central role in global projects for eMobility. Together with your team, you will develop best practices and technologies to help shape the caravanning of tomorrow in line with our innovation strategy.

Lead Engineer Electromobility (m|f|d)

YOUR TASKS

- Build and lead a global e-mobility team with resource and budget responsibility
- Overarching leadership of global platform projects such as electrically powered trailer chassis for caravans and electrically/hybrid powered motorhomes
- Define chassis architectures to optimize platforms for different markets and product categories
- Research new technologies, particularly for E-drivetrain, power control and range extension as well as advanced vehicle control strategies and software
- Supporting the development of new business models based on e-mobility
- Support rollout and adoption of global platforms in North America as well as the EU

YOUR PROFILE

- Completed technical university studies (or comparable) with several years of professional experience
- Experience in leading cross-site, interdisciplinary teams preferably in the automotive industry
- Practical knowledge in managing automotive projects, HW&SW
- Experience with high voltage electronics
- Distinct process competence
- Fluent in written and spoken German and English
- Willingness to travel internationally with team leadership on-site and remotely
- Strong entrepreneurial character, affinity for technology combined with market and customer orientation
- Strong systems and process thinking

WE OFFER

- Exciting and varied tasks with a lot of creative freedom in an international group of companies
- An environment with focus topics from automotive and eMobility in a segment of the leisure and tourism industry characterised by growth
- A motivated team, trusting cooperation, flat hierarchies and fast decision-making processes
- Performance-related remuneration as well as employer allowances for social benefits such as company pension scheme, childcare, vehicle rental at employee conditions, attractive car leasing offers, participation in the job bike and participation in our health management campaigns
- Trust-based working hours with flexible home office options
- A wide range of individual training and development opportunities at our internal EHG Academy and beyond
